

Underground Utility Locating and Mapping

GeoView, Inc. is a full-service, geophysical firm serving the United States and Caribbean. GeoView has performed over 4,500 geophysical investigations. Over 1,000 of these projects have involved Underground Utility Locating.

Services Offered

GeoView offers an array of methods to locate underground utilities. These methods include:

- Ground Penetrating Radar (GPR)
- Electronic Pipe and Cable Locators
- Vacuum Excavation

GeoView offers Level B and limited Level A utility designation services and GPS surveying capability with sub-foot accuracy.

Final results can often be provided in “real time” allowing features of interest to be identified and marked during the site survey or in complete final reports with figures in AutoCAD or ArcView formats.

Typical Projects

Designating Utilities for:

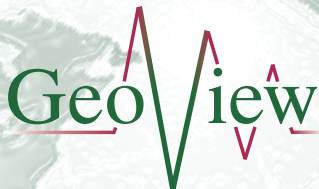

- Construction, Excavation Activities
- Environmental Assessment
- Design Build Studies
- Utility Repair or Upgrade Projects

Locate Voids and Low-Density Soils Around Pipelines
